Mar 2026 - Jul 2026

Lead Strategic Account Manager

JustCall (SaaSLabs)

Internal move from scaled CS leadership to build the Account Management function for the strategic portfolio.

Oct 2024 - Feb 2026 | Bengaluru, India

- Established JustCall's Account Management function for a **$13M+ portfolio with 1,100+ strategic clients**, partnering with CS leadership to design a repeatable expansion model.
- Led an **AI Voice Agent implementation for Nexford**, building a qualification flow across country-specific courses and pricing with scholarship logic and HubSpot tagging, which bucketed **85%+ of inbound leads accurately** in testing and led to a **$60K license expansion** after two months of iterations.
- Launched multi-channel expansion and cross-sell campaigns (AI Voice Agent, annual conversions, plan upgrades) generating **$2M+ in qualified pipeline**, 30% of the required pipeline, using usage signals for personalised bulk outreach at a 25%+ open rate.
- Owned renewals and gross expansion for a **$1.2M ARR EMEA portfolio of 90 strategic accounts**, consistently achieving **100-140% of quarterly revenue targets**.
- Partnered with CS leadership on revenue forecasting and quota planning, using a 35% win rate to set pipeline-coverage benchmarks and allocate quarterly targets across expansion levers.
- Worked with Product, Marketing and the CEO's office to bring strategic account feedback into product and go-to-market decisions.
- Prepared GTM collateral and hosted live webinars for new feature releases to generate early pipeline and equip reps with an upsell strategy for each launch.

Team Lead, Customer Success (Scaled)

JustCall (SaaSLabs)

Joined as a CSM to establish JustCall's Scaled Customer Success vertical; formally promoted to Team Lead within 8 months as the function scaled.

Jan 2024 - Oct 2024 | Bengaluru, India

- Built and led JustCall's Digital Customer Success operating model for a high-volume PLG segment, designing systems, processes and team structure for an **$8M ARR business (5,000+ accounts, 40% of company ARR)**.
- Drove **segment NRR from 85% to 97%** by directing CSM effort towards growth-potential and high-risk accounts and engaging low-touch or dormant accounts through hyper-personalised bulk targeting.
- **Scaled CSM capacity from 1:800 to 1:1,200+ accounts** by introducing predictive health scores and AI account insights, enabling faster account reviews and meeting prep.
- Led a customer intelligence initiative, collating business insights (pain points, use cases and growth triggers) from 500+ accounts into an LLM dataset that refined ICP definition and informed pricing and packaging decisions.
- Reduced **90-day logo churn from 40% to 22%** by refining top-of-funnel ICP criteria with Marketing, filtering low-fit signups before onboarding and protecting downstream margins.
- Built a centralised customer engagement process from scratch, with campaign governance and weekly reporting, so lifecycle outreach ran as one repeatable system rather than individual CSM effort.
- Directly managed and coached 10 CS Associates (up to 6 concurrently), designing structured development paths and creating an internal talent pipeline for strategic roles.

WORK EXPERIENCE

Product Success Manager

Sprinklr

Managed adoption, retention and growth for global enterprises in the US and Europe for the Sprinklr Social vertical. Promoted from Platform Specialist to Product Success Manager within 10 months.

May 2021 - May 2023 | Remote (India)

- Managed a **$4.6M ARR enterprise portfolio** spanning Healthcare, Finance, Tech and F&B, partnering with Marketing and Operations executives to maintain **94%+ NRR** (against the 85% benchmark).
- Led renewal strategies for high-risk enterprise accounts, aligning cross-functional teams to resolve critical escalations, including converting a **$1.2M at-risk RFP** for the American Heart Association into a **3-year renewal with 220% contract growth**.
- Executed success plans across 5 strategic pillars (Adoption, Engagement, Relationship health, Upsell and Competitor Takeout) via business reviews and bespoke workshops to achieve 87% license consumption and 66% feature adoption.
- Designed a gamification model for a leading insurance client to scale their social media presence through 15,000+ field agents, **improving platform adoption by 71% within 3 months** and producing a case study for businesses with distributed workforces.
- Awarded Star Performer of the Quarter for leading retention numbers at 100% NRR in Q3 2022.

Associate Consultant

Capgemini

Delivered enterprise transformation and process improvement initiatives, leading ERP integration, change management and operational analytics.

Aug 2018 - May 2021 | Mumbai, India

- Led **SAP ERP integrations and change management for Panasonic Automotive** (US and Japan) with a team of 4, ensuring platform stability and on-time deployment across global supply chain environments.
- Generated **$120K in expansion revenue** by conducting client research, delivering executive presentations and securing approval for 3 new product enhancement proposals.
- Improved the change management workflow, reducing production errors by 40% in a quarter by standardising the review and approval process across teams and departments.
- Built a real-time KPI analytics dashboard for client leadership, allowing end-to-end visibility into team activity and supply chain logs, reducing performance issues and boosting client CSAT by 12%.
